

## HOW TO LOAD YOUR TUNES

Start by plugging your device into the OBDII port located under the dash. This step is necessary for performing any of the following actions with your device.

### To Load a Custom Tune:

1. Select "Program Vehicle" from the main menu.
2. Select "Custom Tune".
3. Choose your desired tune from the menu & continue.
4. Select "Continue" if your desired tune is pictured on the screen.
5. Select "Begin Program".
6. At this point, the tuner will display "Setup Device" and count up to 100%.
7. Follow device prompts for cycling key ON/OFF to finish loading your custom tune.

**\*\*To switch between custom tunes, simply follow above directions and select the tune you wish to switch to.\*\***

### To Return Car to Stock:

1. Select "Program Vehicle" from the main menu.
2. Select "Return to Stock".
3. Press "Continue" to load stock settings.
4. Follow device prompts for cycling key ON/OFF to finish returning your vehicle to stock.

### To Read Diagnostic Trouble Codes (Check Engine Light):

1. Select "Vehicle Information" from the main menu.
2. Select "Read DTC".
3. The device will prompt you to turn the key to ON, but do not start the engine.
4. A list of any Diagnostic Trouble Codes will be listed for you on the device screen.

### To Pull a Strategy Code:

**\*\*Only perform when instructed by Bama Tuning\*\***

1. Select "Vehicle Information" from the main menu.
2. Select "Vehicle Info".
3. The device will prompt you to turn the key to ON, but do not start the engine.
4. The device will display the vehicle's VIN number on the screen. Press "Select" to continue.
5. The device will now display the vehicle's Strategy Code, which should look similar to the following: **FBNF1GA.hex**

### To Update the Device Drivers:

1. Connect device to your computer using the supplied USB cable.
2. On your PC, click the "Start" button on the lower left-hand corner of the screen.
3. Right click the "My Computer" tab; this will open a drop down menu.
4. Select "Properties" from the drop-down menu; this will open a new window on your desktop.
5. Select the "Hardware" tab.
6. Select "Device Manager".
7. When a new window appears, right click on the yellow icon labeled "Jungo" and select "Update Drivers".

Follow any further instructions as prompted.
